

FIRST HIRING—Employees to work in The Garrett Corporation's new AiResearch Facility in Torrance were sought this week with the Torrance Department of Employment. Here Robert L. Ehinger, personnel manager (center) places an order for three guards to serve on the plant protection force of Robert Lake, chief of plant protection (right). Francine

Pouey, employment security officer in Torrance, accepts the order. Most employees in the new facility will be transferred from AiResearch's present facility. However, Ehinger pointed out that any requirements for additional employees will be sought through the Torrance Department of Employment.

### Two Torrance High Students Honored for Scholarship

Two seniors at Torrance High School have been honored for outstanding performance on the National Merit Scholarship Qualifying Test given last spring.

Each student who is endorsed by his school receives a formal Letter of Commendation signed by his principal and the president of the National Merit Scholarship Corporation.

The students are Jon George Lehr and John Michael Orr. The commended students were among the high school juniors in more than 15,000 schools who took the NMSQT last spring. The test is a three-hour examination which covers five separate areas of educational development. It was the first step in the sixth annual Merit Program.

This year's program will conclude May 1, 1961 with the naming of students who will receive four-year Merit Scholarships to the colleges of their choice.

The annual Merit Scholarship competition is open to all high schools in the United States and its territories. Approximately 3200 Merit Scholars are currently enrolled in about 400 colleges and universities. Almost 500 Merit Scholars have been graduated.

### United Nations Week Launched at Disneyland

Observance of United Nations Week in Southern California was launched last Saturday at Disneyland, with costumed children, vocal groups and motion picture-TV star Jan Sterling participating.

Co-sponsored by all of the Southern California Chapters of the United Nations Association, the event took place at the Plaza Gardens in Disneyland.

Highlighting the program was the appearance of the Long Beach United Nations Children, a group of 82 youngsters dressed in costumes representing many of the United Nations' member countries. They joined the Chapman College Chorus in a special United Nations' hymn, "Let There Be Peace."

Miss Sterling read President Eisenhower's Proclamation to the United Nations, issued to commemorate the world organization's 15th anniversary. Hammarstrand's "Message to Children" was delivered as a dramatic voice-chorus reading by a group of 30 students from the Starbuck Intermediate School of La Habra.

### Christian Science Lesson-Sermon

The practical significance for today of Christ Jesus' victory over death will be brought out at Christian Science churches Sunday in the Lesson-Sermon entitled "Probation After Death."

Scriptural readings will include this account from Mark's Gospel: "Now when Jesus was risen early the first day of the week; he appeared first to Mary Magdalene, out of whom he had cast seven devils. . . . Afterward he appeared unto the eleven as they sat at meat, and upbraided them with their unbelief and

hardness of heart, because they believed not them which had seen him after he was risen" (16:9, 14). Mary Baker Eddy writes in "Science and Health with Key to the Scriptures," "Jesus' unchanged physical condition after what seemed to be death was followed by his exaltation above all material conditions; and this exaltation explained his ascension, and revealed unmistakably a probationary and progressive state beyond the grave" (p. 46)

### Award Presented Torrance High Algebra Teacher

A Torrance High School teacher, William Ludwig, trigonometry and advanced algebra instructor, has received a full year scholarship from the National Science Foundation, it was announced today.

Ludwig will attend the modern math course at the

University of California at Los Angeles one night a week. In the modern math course National Science Foundation scholarship winners will study the content and methods of teaching the newer concepts of higher mathematics.

Ludwig was a recipient of a summer school scholarship

offered by the National Science Foundation during the summer of 1960. Three other Torrance High teachers studied advanced method under the auspices of the foundation.

Jack Knapp, instructor of physics and mathematics at Torrance High School, studied in the field of mathematics at Highlands University, Las Vegas, New Mexico. Robert McKnight, science department chairman and chemistry teacher, studied radiation in biology in the University of New Mexico at Albuquerque, and Alfred H. Smith attended the summer institute for high school teachers of biology at the University of Southern California.

### DELAVAY OSMANTHUS

A sunny patio or door step is an ideal winter setting for the Delavay Osmanthus, that sweetly fragrant little shrub which shows its white flowers early in the new year before spring sets in. And dwarf citrus are perfectly suited to similar settings. Their colorful fruit will linger on to decorate the little shrubs.

### BIG DIFFERENCES

During the past 12 years, the cost of building labor has increased at almost twice the rate of building materials, Anaconda home specialists report. They point out that this disparity enhances the value of materials such as lightweight copper tube for drainage systems, because use of these lighter-weight, easier-to-handle materials reduces costly installation time.
